- Database : NoSQL (MongoDB, Firebase)
- Version control: Git
- Soft Skills: Problem-solving, Communication, Time management

LANGUAGES

- English (Fluent)
- German (Basics)

PROFILE

Full-stack web developer with strong manual testing experience. Skilled in building web projects with both frontend and backend development, including database integration. Experienced in creating and executing test cases, identifying defects, and effectively working with development teams. I bring independence, flexibility, and problem-solving skills to my work and I'm looking for opportunities in a supportive and innovative environment to learn, grow, and collaborate on projects.

WEB DEVELOPMENT PROJECTES

MyFlix

Full Stack Developer, Career Foundry

- Developed and maintained user-friendly interfaces using React and Angular, ensuring smooth user interaction and responsive design.
- Implemented user authentication (signup/login) and session management using JWT (JSON Web Tokens) to secure user data.
- Created the "Add to Favourites" feature, allowing users to curate personalised movie lists, which became one of the most-used functions and significantly enhanced user satisfaction.
- Designed and managed RESTful APIs with JavaScript and MongoDB for handling user data, movie searches, and favourite movie lists, ensuring robust backend support.
- Developed advanced search and filter features for movies based on name and genre, reducing search times by 50%.
- Tested APIs using Postman to ensure functionality and reliability, maintaining a 95% uptime, which contributed to positive user feedback.

MyApp

Full Stack Developer, Career Foundry

- Developed a serverless Progressive Web Application (PWA) using React.
- Implemented a Test-Driven Development (TDD) approach to ensure robust and reliable code.
- Integrated the Google Calendar API to fetch and display upcoming events.
- Enhanced User Experience with advanced features like offline access and fast load times.

EXPERIENCE

Software Test Engineer

Vee Source Global Pvt Lmtd, India

- Addressed frequent bugs in production releases by identifying gaps in test coverage.
- Designed and implemented comprehensive test plans and scripts, increasing test coverage to over 90% across all modules.
- Collaborated closely with developers to understand edge cases and potential risks, ensuring thorough testing.
- Reduced the number of bugs in production by 60% over six months, significantly improving software stability.
- Contributed to increased client satisfaction through more reliable and stable software releases.
