+49 15163164471

SUMMARY

QA Engineer with over four years of experience in manual software testing, specializing in functional, regression, system and API testing for enterprise web applications. Experienced in designing test cases, defect management, SQL validation and collaborating with cross-functional teams to deliver high-quality software. Recently expanded my technical expertise through Full Stack Web Development, applying modern testing practices including REST API testing, Postman, Jest and Test-Driven Development (TDD). Currently seeking a QA Engineer position where I can contribute my testing experience while continuing to grow in test automation.

TECHNICAL SKILLS

Testing: Manual Testing, Functional, Regression, System, API Testing, Test Case Design, STLC

Automation & Testing: Selenium WebDriver, TestNG, Jenkins, Playwright (Learning), Jest

Tools: Postman, Jira, Mantis, Git, Chrome DevTools

Programming: JavaScript, TypeScript, React, Angular, Node.js, Express, HTML5, CSS3

Databases: SQL, MongoDB, PostgreSQL

Cloud: AWS (EC2, S3, Lambda)

Methodologies: Agile (Scrum), TDD

PROFESSIONAL EXPERIENCE

Software Test Engineer, Vee Source Global Pvt. Ltd, India

Feb 2014 – Aug 2018

Key Responsibilities

- Designed and executed manual test cases based on business requirements.
- Performed functional, regression, system, UI and cross-browser testing.
- Logged, tracked and verified software defects using Mantis.
- Validated backend data using SQL queries.
- Collaborated with developers and business analysts to ensure software quality.

Cold Storage Management System | Domain: Logistics & Supply Chain

Environment: Selenium WebDriver, TestNG, Jenkins, SQL

- Executed functional and regression testing for warehouse and inventory management workflows.
- Validated backend data using SQL queries and reported defects.
- Assisted with Selenium automation scripts and regression execution using Jenkins
- Collaborated with developers to verify bug fixes before release.

GynoMark | Domain: Healthcare

Environment: Manual Testing, Mantis

- Designed and executed manual test cases based on business requirements.
- Performed functional, regression, UI and cross-browser testing.
- Logged, tracked and verified defects using Mantis.
- Supported release validation through structured testing activities

Active Student (Poojitha Technologies) | Domain: Education

Environment: Manual Testing

- Tested student, teacher and administration modules.
- Created test cases and executed regression testing.
- Verified application workflows and reported issues.

- Ensured application usability and functional quality.

VSG Internal Project | Domain: Enterprise Business Application

Environment: Manual Testing, SQL

- Performed functional and regression testing for internal business applications.
- Validated backend data and business workflows.
- Assisted developers during defect analysis and verification.
- Maintained detailed test documentation and execution reports.

Career Break – Family Responsibilities & Relocation

10/2018 – 12/2022

Relocated to Germany and focused on family responsibilities while preparing to return to the IT industry.

TECHNICAL PROJECTS

Personal Projects (2023 – Present)

The following projects were developed as part of my Full Stack Web Development training while applying software testing best practices.

myMovie API | [GitHub](#) | **Environment:** Node.js, Express, MongoDB, Postman

- Developed a RESTful API supporting user authentication, movie browsing and favorites management.
- Designed and executed API tests using **Postman**, validating CRUD operations, authentication, response codes and error handling.
- Verified MongoDB data consistency and backend functionality during testing.
- Managed version control using Git and GitHub while continuously improving the application.

Event Planner App | **Environment:** React, Google Calendar API, Jest, TDD

- Built a Progressive Web Application using React.
- Applied **Test-Driven Development** (TDD) during implementation.
- Created unit tests using Jest.
- Tested API integration and event filtering functionality.

Chat App | **Environment:** React Native, Firebase

- Developed a cross-platform mobile chat application.
- Performed functional testing for messaging, image sharing and geolocation features.
- Tested application behavior on **Android** and **iOS emulators**.
- Validated Firebase data synchronization.

AWS Three-Tier Application | **Environment** : AWS EC2, S3, Lambda, Node.js

- Designed and deployed a cloud-based three-tier web application.
- Validated backend functionality after deployment.
- Tested serverless image-processing workflows.

EDUCATION

- | | |
|--|----------------------|
| • German Language, DAA Munich
Completed B2 German Examination (<i>Result Pending</i>) | May 2025 – June 2026 |
| • Full Stack Web Development, CareerFoundry, Berlin | Oct 2023 – Oct 2024 |
| • Bachelor of Technology, JNTU University, India
Electronics and Communication Engineering (ECE) | June 2009 – May 2013 |

LANGUAGES

- English – Fluent
- German – B2 (Exam completed, result pending)

Work Authorization: Eligible to work in Germany
